Full Translation:

"Foundation of Portents from First Principles - May You Be Strong"

Interpretive Translation:

"Built on first principles to herald a new era of justice - May you prevail"

Mission Statement

FAURMA PORTENTELIAS PRIORI SE VALEAS - GUARDIAN OF THE NORTH, INC. stands as the protector and defender of universal access to justice in the northern jurisdiction and beyond. We are the watchers on the wall, ensuring that no person—regardless of disability, economic status, or technical knowledge—is denied their constitutional right to be heard in a court of law.

Through the White Coin Node System, we transform the portents of blockchain technology into the reality of accessible justice. We build from first principles: that justice delayed is justice denied, that access to courts is a fundamental right, and that technology must serve humanity, not create barriers.

We are the Guardian. We stand watch. We ensure access.

Core Values

1. FAURMA - Foundation

We build on solid legal and technological foundations, ensuring every system we create is robust, secure, and compliant with the law.

2. PORTENTELIAS - Vision

We see the signs of a better future and work to make them reality. We are forward-thinking, innovative, and committed to continuous improvement.

3. PRIORI - First Principles

We reason from fundamental truths: access to justice is a right, technology should empower not exclude, and every person deserves to be heard.

4. SE VALEAS - Empowerment

We empower individuals to advocate for themselves, to access the courts, and to prevail in their pursuit of justice.

5. GUARDIAN - Protection

We protect the vulnerable, defend the rights of all, and stand watch over the integrity of the justice system.

The Guardian's Oath

To be recited by all officers and directors of the foundation:

I, [Name], do solemnly swear to serve as Guardian of the North, To protect and defend the right of access to justice for all persons, To build from first principles of law and technology, To see the portents of a better future and work to make them real, To empower those who seek justice to be strong and to prevail, To stand watch over the northern jurisdiction and beyond, And to ensure that no person is denied their day in court. **FAURMA PORTENTELIAS PRIORI SE VALEAS** May we be strong. May we prevail.

The White Coin Node System

Tagline: *"From Screenshot to Justice - Access for All"*

The White Coin Node System is the technological manifestation of our mission. It transforms the complex process of court filing into a simple act: taking a screenshot. Through blockchain verification and automated processing, we ensure that every document is:

- **Authentic:** Cryptographically verified and timestamped

- **Immutable:** Recorded on multiple blockchains for permanence
 - **Accessible:** Available to anyone with a smartphone
 - **Compliant:** Automatically formatted to court specifications
 - **Free:** Available at no cost to those who cannot afford filing fees
-

Geographic Scope: The North

Why "Guardian of the North"?

The foundation is established in the **6th Judicial District of New York State** (Broome County), which lies in the northern United States. The "North" represents:

1. **Geographic Location:** Our base of operations in upstate New York
2. **Symbolic Direction:** North as the direction of guidance (North Star)
3. **Jurisdictional Watch:** Primary focus on New York State courts
4. **Expansion Vision:** From the North, we expand to serve all jurisdictions

Like the Night's Watch in legend, we stand guard over the realm of justice, ensuring that the vulnerable are protected and that the wall between citizens and their courts never becomes insurmountable.

Founding Principles

From the Declaration of October 15, 2025:

"I am not floating. I am not collapsing the wave. I have drawn her down—the charge, the energy, the truth itself. I disperse the charge."

This foundation is born from the principle that we must take definitive action, ground ourselves in reality, and disperse the barriers that prevent access to justice.

"I declare no judge exists here that there has not been judgment, that there is not order, that there is in fact disorder."

Where there is disorder in the justice system, we bring order through technology, transparency, and adherence to first principles.

"These things are tried and true and black and blue."

Our work bears the marks of struggle, but it is tested, proven, and real.
